International Journal of
Quantum Chemistry

Contents for Volume 70, 1998

Issue No. 1, 1998

Special Issue: The Ninth International Congress of Quantum Chemistry (Part I of II)
Guest Editors: Keiji Morokuma, Ernest R. Davidson, and Henry F. Schaefer, III

Introduction
K. Morokuma **1**

List of Participants **3**

The Chemical Hamiltonian Approach for Treating the BSSE Problem of Intermolecular Interactions
I. Mayer **41**

Unitary-Group-Based Open-Shell Coupled-Cluster Method with Corrections for Connected Triexcited Clusters. I. Theory
X. Li and J. Paldus **65**

Numerical Coupled Liouville Approach: Quantum Dynamics of Linear Molecular Aggregates Under Intense Electric Fields
M. Nakano and K. Yamaguchi **77**

Calculations on Diatomic Molecules with Slater-Type Orbital Basis Sets
A. Bouferguene, B. Etemadi, and H. W. Jones **89**

Transition-State Optimization on Free Energy Surface: Toward Solution Chemical Reaction Ergodography
N. Okuyama-Yoshida, M. Nagaoka, and T. Yamabe **95**

Electrostatic Effect of the Polar Bond–Polarizable Bond Interaction on ^{13}C Chemical Shifts
J. E. Peralta, M. C. Ruiz de Azúa, and R. H. Contreras **105**

Topology of Electronic Densities Taken from Parametric Methods: A Predictive Tool?
A. Sierraalta, F. Ruette, and E. Machado **113**

Scaling Behavior of Energy Functionals of Highly Complex Electron Distributions
J. Pipek and I. Varga **125**

"Statistical–Mechanical" Understanding of Chemical Reaction Mechanism in Solution: Energy Fluctuations and Heat Capacities for Isomerization of Formamidine in Aqueous Solution
M. Nagaoka, Y. Okuno, and T. Yamabe **133**

Scaling Behavior of Dynamic Correlation Effects
W. Wenzel, M. M. Steiner, and K. G. Wilson **147**

Perspectives for Java-Based Computational Quantum Chemistry
D. H. Mosley **159**

Localized Orbitals in Nonmetallic Ring Systems
P. Reinhardt, J.-P, Malrieu, À. Povill, and J. Rubio **167**

Efficient Evaluation of Integrals for Density Functional Theory: Nonlinear *D* Transformations to Evaluate Three-Center Nuclear Attraction Integrals over *B* Functions
H. Safouhi, D. Pinchon, and P. E. Hoggan **181**

Atomic Calculations with an Augmented Fourier Basis
F. A. Pahl **189**

Dressed Potential Energy Surface of the Hydrogen Molecule in High-Frequency Floquet Theory
C. Pérez del Valle, R. Lefebvre, and O. Atabek **199**

Symmetry Aspects of Nonrigid Molecules and Transition Structures in Chemical Reactions
L. Bytautas and D. J. Klein **205**

Some Recent Developments of High-Order Response Theory
Y. Luo, D. Jonsson, P. Norman, K. Ruud, O. Vahtras, B. Minaev, H. Ågren, A. Rizzo, and K. V. Mikkelsen **219**

Issue No. 2, 1998

Special Issue: The Ninth International Congress of Quantum Chemistry (Part II of II)
Guest Editors: Keiji Morokuma, Ernest R. Davidson, and Henry F. Schaefer, III

Intermolecular Hydrogen Bonding and Low-Wave-Number Vibrational Spectra of Formamide, *N*-Methylformamide, and *N*-Methylacetamide in the Liquid State
H. Torii and M. Tasumi **241**

Density Functional Investigations of Carboxyl Free Radicals: Formyloxyl, Acetyloxyl, and Benzoyloxyl Radicals
M. Kieninger, O. N. Ventura, and S. Suhai **253**

Hyperpolarizabilities of One-Dimensional H_n Systems: Second Hyperpolarizability Density Analyses for Regular and Charged Solitonlike Linear Chains
M. Nakano, S. Yamada, S. Kiribayashi, and K. Yamaguchi **269**

Spectroscopic Constants and Bonding Features of the Low-Lying States of LiB and LiB^+: Comparative Study of VBSCF and MO Theory
Z. Cao, W. Wu, and Q. Zhang **283**

Theoretical Model for the Reaction Mechanisms of Singlet Carbene Analogs into Unsaturated Hydrocarbon and the Origin of the Activation Barrier
S. Sakai **291**

Difficulties of Density Functional Theory in Predicting the Torsional Potential of 2,2′-Bithiophene
P. M. Viruela, R. Viruela, and E. Orti **303**

Theoretical Study of Structure and NMR Properties of the μ-Hydrido-Bridged Cyclodecyl Cation and Related Systems
V. Galasso **313**

Ab Initio Study on the Reaction $2NH_2 \rightarrow NH + NH_3$
Z.-F. Xu, D.-C. Fang, and X.-Y. Fu **321**

Creation of Intensity Theory in Vibrational Spectroscopy: Key Role of Ab Initio Quantum Mechanical Calculations
B. Galabov, T. Dudev, S. Ilieva, and J. R. Durig **331**

Electronic Structure of Alumina Surface
L. Turi Nagy, M. Micov, Ľ. Benco, M. Liška, P. Mach, and D. Tunega **341**

First Principles Study of Na Adsorption on TiO_2 (110) Surface
M. A. San Miguel, C. J. Calzado, and J. Fernández Sanz **351**

Theoretical Models for γ-Al_2O_3 (110) Surface Hydroxylation: An Ab Initio Embedded Cluster Study
J. Fernández Sanz, H. Rabaâ, F. M. Poveda, A. M. Márquez, and C. J. Calzado **359**

CO_2 and NH_3 Interaction with ZnO Surface: An AM1 Study
J. B. L. Martins, E. Longo, and C. A. Taft **367**

Electronic Structure and Catalytic Properties of Waugh-Type Anion $(NiMo_9O_{32})^{6-}$
S.-X. Xiao, S.-Y. Yang, and T.-L. Chen **375**

Quantum Mechanical Treatment for the Diffusion Process of a Hydrogen Atom on the Amorphous Water Ice Surface
J. Takahashi, M. Nagaoka, and K. Masuda **379**

Oxygen Binding to Iron–Porphyrin: A Density Functional Study Using Both LSD and LSD + GC Schemes
C. Rovira and M. Parrinello **387**

Ab Initio Relative Stability of a Few Conformers of Bilirubin *in Vacuo* and in Aqueous Solution (PCM)
G. Alagona, C. Ghio, A. Agresti, and R. Pratesi **395**

GROMOS-MD Simulations on the Coenzyme Thiamin Diphosphate in Apoenzyme Environment
R. Friedemann, A. Von Fircks, and S. Naumann **407**

Issue No. 3, 1998

Theoretical and Computational Developments

Macroscopic Solvent Polarization-Induced Reorganization of the Electron Density in Different Excited States: A Study on Formaldehyde Molecule by a Multiconfiguration Self-Consistent Reaction-Field Method
C. Medhi and S. P. Bhattacharyya **415**

Products of Arbitrary Class-Sums in the Symmetric Group
J. Katriel **429**

Femtosecond Quantum Fluid Dynamics of Helium Atom Under an Intense Laser Field
B. Kr. Dey and B. M. Deb **441**

Properties, Dynamics, and Electronic Structure of Atoms and Molecules

DVR Study of the $\tilde{A}^2B_2 \leftarrow \tilde{X}^2A_1$ Absorption Spectrum of NO_2
D. Belmiloud and M. Jacon **475**

Full Variational Molecular Orbital Method: Application to the Positron–Molecule Complexes
M. Tachikawa, K. Mori, K. Suzuki, and K. Iguchi **491**

Properties, Dynamics, and Electronic Structure of Condensed Systems and Clusters

Ring Currents in Condensed Ring Systems
Y. Anusooya, A. Chakrabarti, S. K. Pati, and S. Ramasesha **503**

Molecular Structure, Dynamics, and Function of Biological Systems

On the Possible Reaction Pathway for the Acylation of AChE-Catalyzed Hydrolysis of ACh: Semiempirical Quantum Chemical Study
Q. Wang, H. Jiang, J. Chen, K. Chen, and R. Ji **515**

Books Received **527**

Issue No. 4/5, 1998

Introduction
N. Y. Öhrn, J. R. Sabin, and M. C. Zerner **529**

List of Participants **531**

3,5-Contracted Schrödinger Equation: Determining Quantum Energies and Reduced Density Matrices Without Wave Functions
D. A. Mazziotti **557**

Nonconventional Partitioning of the Many-Body Hamiltonian for Studying Correlation Effects
P. R. Surján, M. Kállay, and Á. Szabados **571**

Unambiguous Exchange–Correlation Energy Density for Hooke's Atom
K. Burke, F. G. Cruz, and K.-C. Lam **583**

SCF Calculations with Density-Dependent Local-Exchange Potential
V. Karasiev, E. V. Ludeña, and R. López-Boada **591**

Investigation of an Asymmetric Triple-Excitation Correction for Coupled-Cluster Energies
T. D. Crawford and J. F. Stanton **601**

Excitation Energies in Brillouin–Wigner-Based Multireference Perturbation Theory
W. Wenzel **613**

More About the Leaky Aquifer Function
F. E. Harris **623**

Use of a Fast Fourier Transform (FFT) 3D Time-Dependent Schrödinger Equation Solver in Molecular Electronic Structure
B. Ritchie and C. A. Weatherford **627**

Modern Valence Bond Descriptions of Molecular Excited States: An Application of CASVB
T. Thorsteinsson and D. L. Cooper **637**

Approximate Brueckner Orbitals and Shakeup Operators in Electron Propagator Calculations: Applications to F^- and OH^-
J. V. Ortiz **651**

Density Functional Theory Without the Born–Oppenheimer Approximation and Its Application
Y. Shigeta, H. Takahashi, S. Yamanaka, M. Mitani, H. Nagao, and K. Yamaguchi **659**

Analytical Asymptotic Structure of the Pauli, Coulomb, and Correlation–Kinetic Components of the Kohn–Sham Theory Exchange–Correlation Potential in Atoms
Z. Qian and V. Sahni **671**

Excited States in Density Functional Theory
Á. Nagy **681**

A Density Functional Study of Small Nickel Clusters
M. C. Michelini, R. Pis Diez, and A. H. Jubert **693**

Stable and Efficient Numerical Method for Solving the Schrödinger Equation To Determine the Response of Tunneling Electrons to a Laser Pulse
M. J. Hagmann **703**

Excited Electronic States of Carotenoids: Time-Dependent Density-Matrix-Response Algorithm
S. Tretiak, V. Chernyak, and S. Mukamel **711**

Balanced Complete Active Space Choices with the Multiconfigurational Spin Tensor Electron Propagator Method: The Vertical Ionization Potentials of NH_2
A. J. McKellar, D. Heryadi, and D. L. Yeager **729**

Effect of Heavy Atom on the Second Hyperpolarizability of Tetrahydrofuran Homologs Investigated by Ab Initio Molecular Orbital Method
K. Kamada, M. Ueda, H. Nagao, K.Tawa, T. Sugino, Y. Shimizu, and K. Ohta **737**

Structure Dependence of the Low-Lying Excited States and the First Dipole Hyperpolarizability of Phenol Blue
A. Serrano and S. Canuto **745**

Nonresonant Frequency Dispersion of the Electronic Second Hyperpolarizability of *All-Trans* Polysilane Chains: An Ab Initio TDHF Oligomeric Approach
B. Champagne, É. A. Perpète, and J.-M. André **751**

Computation of the Electromagnetic Harmonics Generation by Stratified Systems Containing Nonlinear Layers
A. Calderone and J.-P. Vigneron **763**

Theory and Calculations of Electric Field Effects on Hyperfine Interactions
S. P. Karna **771**

Differential Equations for Ground-State Electron Density and Slater Sum in Atoms and Molecules With and Without External Fields
N. H. March **779**

Ground States of Atoms and Molecules in Strong Magnetic Fields
P. Schmelcher **789**

Some Aspects of Data Processing for an Optical Absorption Experiment in a Pulsed 1000-Tesla Magnet
L. G. Butler, A. W. Maverick, C. H. Gallegos, J. D. Goettee, B. R. Marshall, C. M. Fowler, D. G. Rickel, J. M. Gonzales, and L. J. Tabaka **797**

Optimal Decoupling of Positive- and Negative-Energy Orbitals in Relativistic Electronic Structure Calculations Beyond Hartree–Fock
C. F. Bunge, R. Jáuregui, and E. Ley-Koo **805**

Second-Order Multiconfigurational Dirac–Fock Calculations on Boronlike Ions
M. J. Vilkas, Y. Ishikawa, and K. Koc **813**

Relativistic Effects on the Structural Phase Stability of Molybdenum
J. C. Boettger **825**

Water Cluster Approach To Study Hydrogen-Bonded Pattern in Liquid Water: Ab Initio Orientational Defects in Water Hexamers and Octamers
E. S. Kryachko **831**

Intramolecular Proton Transfer in Monohydrated Tautomers of Cytosine: An Ab Initio Post-Hartree–Fock Study
L. Gorb and J. Leszczynski **855**

Intramolecular Hydrogen Bonding in Resonance-Stabilized Systems
L. A. Schmiedekamp-Schneeweis, and J. O. Payne **863**

Quantum Chemical Study of the Interaction of Nitrate Anion with Water
C. Ebner, R. Sansone, and M. Probst **877**

The Interface of Electronic Structure and Dynamics for Reactions in Solution
Y.-Y. Chuang, C. J. Cramer, and D. G. Truhlar **887**

The Development of Semiclassical Dynamical Methods and Their Application to Vibrational Relaxation in Condensed-Phase Systems
M. F. Herman **897**

Single-Electron-Capture Cross Sections by Alpha-Particles from Ground State *K*(4*s*) and Rb(5*s*): A Molecular-State Approach
A. Kumar, B. C. Saha, and C. A. Weatherford **909**

Bethe–Bloch Stopping-Power Parameters for GaAs and ZnSe
L. E. Porter **919**

Searches on the Potential Energy Hypersurfaces of $GeCH_2$, $GeSiH_2$, and Ge_2H_2
A. J. Boone, D. H. Magers, and J. Leszczyński **925**

Excited-State Potential Energy Curves from Time-Dependent Density-Functional Theory: A Cross Section of Formaldehyde's $^1A_1$ Manifold
M. E. Casida, K. C. Casida, and D. R. Salahub **933**

Effective Potential for e-Neon and e-Argon Scattering by DCS Minimization at Intermediate Energies
J. M. Paikeday and A. Longstreet **943**

Ab Initio SCF–MO Study of the Topology of the Charge Distribution of Acid Sites of Zeolites
H. Soscún, J. Hernández, O. Castellano, G. Díaz, and A. Hinchliffe **951**

Singlet–Triplet Splitting and the Activation of C—H Bond for $(\eta^5\text{-}C_5H_5)M(CO)$ Isoelectronic Fragments: A Theoretical Study
M.-D. Su and S.-Y. Chu **961**

Structural and Electronic Properties of Silicon Nitride Materials
F. De Brito Mota, J. F. Justo, and A. Fazzio **973**

Analysis of Three-Dimensional Molecular Shape Using Surface Area and Molecular Volume Scaling Descriptors
G. A. Arteca **981**

Approximations of the Mulliken Charges for the Oxygen and Silicon Atoms of Zeolite Frameworks Calculated with a Periodic Hartree–Fock Scheme
A. V. Larin and D. P. Vercauteren **993**

Structure and Properties of NH_5^{2+}: A Dication with Two 2-Electron 3-Center Bonds
J. E. Del Bene, J. D. Watts, and R. J. Bartlett **1003**

C_{60} Carbyne Knots (from 0_1 to 6_3): Theoretical NMR Spectra
J. Cz. Dobrowolski and A. P. Mazurek **1009**

Perturbed Ellipsoidal Wave Functions for Quantum Scattering
T. Levitina and E. J. Brändas **1017**

Photochemical Reaction Pathways of Ethylene
L. Freund and M. Klessinger **1023**

Theoretical Studies on Hydrogen Activation by Iridium Dimers
S. Castillo, V. Bertin, E. Solano-Reyes, H. Luna-García, A. Cruz, and E. Poulain **1029**

Electron Propagator Theory of Conformational Effects on Anisole and Thioanisole Photoelectron Spectra
O. Dolgounitcheva, V. G. Zakrzewski, J. V. Ortiz, and G. V. Ratovski **1037**

Advantages of the Fourier Space RHF Band Structure Approach: Application to Polyoxymethylene Using a Distributed Basis Set of *s*-Type Gaussian Functions
I. Flamant, J. G. Fripiat, and J. Delhalle **1045**

Periodic INDO Calculations of Organic Adsorbates on a TiO_2 Surface
P. Persson, A. Stashans, R. Bergström, and S. Lunell **1055**

Sign of the Interaction Parameter in Disordered Fe–Al Alloys
S. Dorfman, D. Fuks, and V. Liubich **1067**

Possibility of Charge-Mediated Superconductors in the Intermediate Region of Metal–Insulator Transitions
H. Nagao, M. Mitani, M. Nishino, Y. Shigeta, Y. Yoshioka, and K. Yamaguchi **1075**

Embedded Cluster and Supercell Study of the Structurre of the Interstitial Cu–C Solid Solutions
D. E. Ellis, S. Dorfman, D, Fuks, R. Evenhaim, and K. Mundim **1085**

Atomic Motion at Germanium Surfaces: Scanning Tunneling Microscopy and Monte Carlo Simulations
J.-P. Vigneron, A. Benaissa, I. Derycke, A. Wiame, and R. Sporken **1093**

Issue No. 6, 1998

Introduction
N. Y. Öhrn, J. R. Sabin, and M. C. Zerner **1099**

List of Participants **1101**

On the Origin of the Lack of Anticonvulsant Activity of Some Valpromide Derivatives
S. M. Tasso, L. Bruno-Blanch, and G. L. Estiú **1127**

Molecular Surface Electrostatic Potentials of Anticonvulsant Drugs
J. S. Murray, F. Abu-Awwad, P. Politzer, L. C. Wilson, A. S. Troupin, and R. E. Wall **1137**

Phytochrome Structure: A New Methodological Approach
C. R. W. Guimarães, J. Delphino da Motta Neto, and R. Bicca de Alencastro **1145**

Studies on the Hydrogenation Steps of the Nitrogen Molecule at the *Azotobacter vinelandii* Nitrogenase Site
K. K. Stavrev and M. C. Zerner **1159**

RHF Conformational Analysis of the Auxin Phytohormones *n*-Ethyl–Indole-3-Acetic Acid ($n = 4, 5, 6$)
M. Ramek and S. Tomić **1169**

pK_a of Cytosine on the Third Strand of Triplex DNA: Preliminary Poisson–Boltzmann Calculations
G. R. Pack, L. Wong, and G. Lamm **1177**

Parametric Transform and Moment Indices in the Molecular Dynamics of *n*-Alkanes
S. P. Molnar and J. W. King **1185**

Theoretical Approach to the Pharmacophoric Pattern of $GABA_B$ Analogs
M. L. Lorenzini, L. Bruno-Blanch, and G. L. Estiú **1195**

Optimal Molecular Connectivity Descriptors for Nitrogen-Containing Molecules
M. Randić, and J. Cz. Dobrowolski **1209**
